

Auto Bin Tipping

KW Auto Bin Tipper

Increase your Productivity with a KW Auto Bin Tipper

Elevate your operation with KW's Auto Bin Tipper, a robust and versatile solution designed to streamline the bin tipping process. Engineered for high performance and reliability, this model suits a variety of bin sizes and offers automatic features to streamline your workflow.

Key Features:

- **Durable Construction:** Complete Stainless Steel Frame ensures longevity and resilience in demanding environments. Powered by a reliable hydraulic system for smooth and controlled tipping.
- **Tailored Bin Fit:** Customisable to match your specific bin dimensions, ranging from 1000x1000x400mm up to 1200x1200x1000mm, for seamless integration with your operation.
 - **Bin Side Loading & Adjustable Bin Height:** Accommodate different bin heights and loading configurations to suit all operations.
- **Floor-Level Loading:** Easily loaded by forklift or pallet jack, minimizing handling time and effort.
- **Automated Tipping System:** Start tipping with ease, using the start button on the control panel or using the portable remote. Photo-electronic sensors monitor fruit levels in your creep feeder, automatically raising the bin to refill the feeder when levels fall below the set point. The Bin is continually raised until all fruit is released and then returned to the start position.
- **Bin Door:** Choose a fixed or hydraulically operated bin door, depending on your product handling needs.
- **Comprehensive Two-Year Warranty & After-Sales Support:** Confidence in quality and ongoing support for peace of mind. Proudly manufactured in Australia
